Sports nutrition is the study and practice of nutrition and diet with regards to improving anyone's athletic performance. Nutrition is an important part of many sports training regimens, being popular in strength sports (such as weightlifting and bodybuilding) and endurance sports (e.g. cycling, running, swimming, rowing). Sports Nutrition focuses its studies on the type, as well as the quantity of fluids and food taken by an athlete. In addition, it deals with the consumption of nutrients such as vitamins, minerals, supplements and organic substances that include carbohydrates, proteins and fats.

Whether you are a bodybuilder, a professional athlete or simply exercising to improve your health, sports nutrition plays a key role in optimising the beneficial effects of physical activity. Making better decisions with your nutrition and hydration can result in improved performance, recovery and injury prevention. Nutrition professionals offer a range of services to support your health and sporting goals. This can range from a daily food diary, to a comprehensive food and nutrition plan for training and competitions.

Kavitha Sangangouda. M. has done M.P.Ed., Ph.D. Presently, She is working as Faculty Member in Dept. of Physical Education, Vijayangar Sri Krishnadevaraya University, Bellary. She has 15 years experience.

History reveals that as humans became more civilized they also become more scientific, and subsequently sought more exact ways to measure. The history of measurement in physical education and sport has paralleled the growth and development of research and the rise of the field to a more respected position in the educational spectrum. For many decades knowledge and skills in the area of measurement have been considered important for graduate study in the field of physical education and sport.

The present book entitled Test, Measurement and Evaluation in Physical Education discusses all the aspects of Test, Measurement and Evaluation in Physical Education.

The contents of the book are as: **Test and Measurement—An Introduction; Test and Measurement in Physical Education and Sports; Environmental Factors and Sports Performance; The Role of Measurement and Evaluation in Education and Physical Education; Flexibility, Fitness, Agility, Balance and Specific Motor Abilities Tests in Physical Education and Sports; Test and Measurement of Muscular Strength; Test and Measurement of Motor Performance; Test and Measurement of Cardiovascular Function; Test and Measurement of Aerobic Power; Measurement Techniques in Physical Education and Sports; Evaluation —An Introduction; Evaluation Processes and Techniques; Evaluation of Performance Tests; and Curriculum Evaluation.**

Hopefully, the present book of immensely useful for the students and teachers of Physical Education and Sports.
